

***IQ 601-2**
PLANNING, IMPLEMENTING AND MANAGING AN
EFFECTIVE INFORMATION QUALITY ENVIRONMENT:
(TIQM P6)*

Larry P. English
President and Principal
Information Impact International, Inc.

Course Description:

Level: Advanced

Good ideas are not automatically adopted in an organization. To implement an *effective Information Quality Environment*, requires vision, planning, relationship building and education.

- In this course, you learn how to establish and grow an effective IQ function and transform the culture to a culture of excellence in information processes and products. Mr. English describes the 14 points of IQ and how to incorporate them into the culture.

You learn the seven business roles of Information Stewardship and the ten or more information systems roles of Information Stewardship and the accountabilities for information. You learn how to create a natural Information Governance mechanism to assure the effective management of information as a strategic business resource.

Course Agenda:

- Essential ingredients of successful change facilitation
- Critical success factors for effective implementation
- Identifying barriers to successful implementation
- Tactics and techniques to overcome those barriers and obstacles for success
- Developing the next steps your organization needs to implement your IQ initiative

Duration: 2 Days

Format: Lecture plus workshop exercises

Pre-Requisites: 1. **Completion of TIQM 101 training or equivalent AND having read Chapters 1, 2, 3, 11, 12 and 13 in *Improving Data Warehouse and Business Information Quality*, AND**
2. **At least 6 months experience applying IQ or Quality principles**

*This course is part of the TIQM Certification program provided by Information Impact International.
